PROFESSIONAL SUMMARY

Full-Stack AI Engineer pursuing MS in Computer Science at University of Michigan–Dearborn (Graduating May 2026), specializing in production-grade AI systems, multi-agent orchestration, and scalable backend architectures. Proven track record delivering LLM-integrated products and REST APIs in fast-paced startup environments. Actively seeking full-time Software Engineer or AI/ML Engineer roles starting Summer/Fall 2026.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, SQL, C++, HTML, CSS

Frameworks: React, Next.js, FastAPI, Node.js, Flutter, Express.js, Material-UI, Tailwind CSS, Livewire

AI / ML: LLaMA, Multi-Agent Systems, LLM Integration, Prompt Engineering, Agentic AI Workflows

Databases: PostgreSQL, MySQL, MongoDB, Redis

DevOps / Cloud: Docker, Kubernetes, AWS, Git, Linux, Vercel, Postman

Testing: pytest, Selenium, JUnit

Certifications: Enterprise Data Science · Node.js/Express/MongoDB Bootcamp · Cybersecurity Fundamentals

WORK EXPERIENCE

Software Engineer Intern — Product Manager Accelerator

May 2025 – Sept 2025

Boston, MA

- Architected and delivered a cross-platform mobile MVP (Flutter + FastAPI + PostgreSQL) end-to-end in 45 days, directly enabling a product demo that secured seed funding for an early-stage startup
- Implemented secure authentication system with JWT tokens and OAuth 2.0, supporting 150+ concurrent users in a production SaaS environment
- Designed and deployed 12+ scalable REST API endpoints with comprehensive error handling and input validation using FastAPI
- Integrated LLM-based multi-agent workflows into the product backend using Python and FastAPI, enabling intelligent agentic AI features
- Developed 10+ reusable React components with Tailwind CSS, reducing development time by 30% across teams
- Maintained zero critical production bugs across the entire codebase by enforcing 80%+ pytest unit test coverage

Software Developer — Akcepted Tech

Nov 2023 – Jul 2024

Bengaluru, India

- Built and shipped 3+ production-ready React/Tailwind frontend applications deployed on Vercel, serving active client users with cross-browser compatibility
- Architected modular Atomic Design component library in React.js, reducing design-to-development handoff time by 35% and improving team scalability across multiple product iterations
- Implemented dynamic features including multi-step form validation, data validation, and interactive UI components, directly reducing client-reported input errors
- Partnered directly with founder and clients across 4+ product iterations to translate business requirements into shippable features

Software Developer Intern — Flyers Soft Private Limited

Feb 2023 – May 2023

Chennai, India

- Redesigned 8+ core UI components resolving critical usability issues, directly improving user retention metrics
- Automated UI regression testing suite using Selenium across 15+ test cases, cutting QA cycle time by 40% and reducing production crash rate
- Identified and resolved frontend performance bottlenecks, improving average page load time by 30% and reducing bounce rates

PROJECTS

Multi-Agent AI Consensus Engine | Python, FastAPI, LLaMA, React, Prompt Engineering

- Built multi-agent AI system orchestrating 5 LLaMA-powered agents using advanced prompt engineering for consensus-based LLM responses
- Designed role-specific prompts (generator, critic, validator) to optimize response quality, diversity, and accuracy
- Implemented parallel async execution via FastAPI, reducing end-to-end inference latency from 8s to 2.5s (68% reduction)
- Developed confidence-weighted voting algorithm and React dashboard visualizing real-time agent consensus
- Achieved 85% pytest coverage for backend validation and comprehensive error handling

Oishii – Restaurant Management SaaS | Laravel, PHP, MySQL, Tailwind CSS, Stripe, Livewire

- Built full-stack restaurant SaaS platform with Laravel, MySQL, and Stripe payment processing including 3D Secure authentication
- Designed normalized relational database schema with 12+ tables and optimized MySQL queries, reducing page load time by 60%
- Created admin dashboard with role-based access control (RBAC) using Livewire and responsive Tailwind CSS UI

SafeUI – API Handling Package | Next.js, TypeScript

- Built reusable TypeScript package preventing UI crashes during API failures with automatic timeout, retry logic, and standardized error handling
- Designed configurable Loading/Empty/Error UI components with single-click retry; packaged with full TypeScript definitions for seamless integration

EDUCATION

University of Michigan – Dearborn

Master of Science in Computer and Information Science | Dearborn, MI

Sept 2024 – May 2026

New Horizon College of Engineering

Bachelor of Science in Computer Science | Bengaluru, India

Jul 2019 – May 2023
